

VILNIUS (VNO/EYVI)

Elevation 615ft

CATEGORY A

AV brief – not required

GENERAL

- Due to shortage of staff/transport and local security requirements it is not possible to visit the departure hall when on the ground. Station staff request that you do not ask to visit duty free.

Threats

Terrain

- Airfield is located on the Southern edge of the city. There are no immediate terrain issues although a number of masts and towers are located throughout the city, the tallest reaching almost 1650ft asl 4 nm NW.

Loss of Control

- Bird Hazard throughout the year, particularly just after sunrise and before sunset.

ARRIVAL

Approach

A32N

Effectivity: A319 UOA-I, UPA-E UPG-Z
 A320 UUA-R, TOB-E
 A321 EDF-J

Due to VOR indication fluctuation the following approaches are prohibited on the effective aircraft irrespective of the guidance modes used: VOR 19 (IAC 7-60).

Note: This restriction is irrespective of OEB42 considerations.

All other Airbus aircraft are unaffected by this restriction

ALL

- ATC will generally offer radar vectors to the ILS
- Circling not authorised in sector 270° to 360°.
- Brightly lit road to the W of the airfield may be confused for the runway.

Diversion Airports

RIGA	RIX/EVRA	144 nm/342°T	CAT A
WARSAW	WAW/EPWA	214 nm/226°T	CAT B
HELSINKI	HEL/EFHK	341 nm/358°T	CAT A
GDANSK	GDN/EPGD	238 nm/266°T	CAT A
KRAKOW	KRK/EPKK	340 nm/216°T	CAT B

GROUND
After Landing

- Certain Taxiways are not equipped with centreline lights. Taxi guidelines may not be visible due snow. Follow me vehicle is available if required.

Departure

- Departure clearance passed by TWR during taxi.

WEATHER

- Lithuania's climate is transitional, between maritime on the coast and continental inland. This is typified in Vilnius where a continental climate, characterised by winter temperatures cold enough to support a fixed period of stable snow, and warm summers with relatively low precipitation occur.
- Temperatures as low as -20°C in the winter and +30° in summer are not uncommon.
